

Sump Tray

The Sump Tray provides a large platform for component support, specifically where an angle is required. The Sump Tray can mount to TED's turntable, Extension Blocks, or any of our angle adjusting turntable attachments.

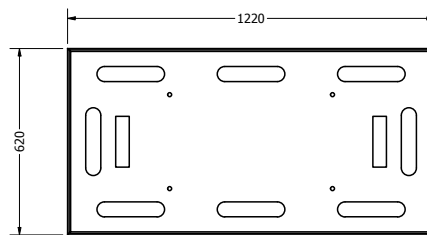

As the name suggests, the Sump Tray attachment is most commonly used for removal and replacement of angled bottom sumps and sound suppression. The Sump Tray can be used either way up, featuring a flat face on one side, and a 45mm edge on the other side.

Specifications

Tare Weight	36kg
Safe Working Load	200kg
Attachment Type	Turntable with Extender
Part Number	TED-ATT-014-00
